Weather

- — Patchy areas of fog/freezing fog in the UK, Ireland, France, Poland & Scandinavia have lingered in to the afternoon. This evening and tonight fog will likely return with similar regions in northwest and eastern Europe at risk, the London TMA is expected to be particularly impacted overnight. Showers and isolated thunderstorms in the North Sea will at times reach the coast of the Netherlands, ISOL CB (Tops FL150-200) expected. ISOL CB(Tops FL220-350) also a low risk, in the Adriatic, Ionian and south Mediterranean seas. In the Atlantic, a deep low named Storm Bruna brings rain and thunderstorms to Madeira and the Canarias, with strong winds for the Azores at times. Bands of rain and showers associated with this system also move towards Iberia, bringing rain, isolated thunderstorms and stronger winds to western areas, especially this evening and overnight where rainfall may be heavy in southwest Iberia. On Monday morning the most likely weather impacts will be LVPs and fog patches that will be slow to clear in NW & Central Europe, and then strong winds, rain and thunderstorms for Iberia and SW-Europe, in association with storm Bruna.
